Presentation

I work primarily as **a UI/UX Designer** , with expertise in Front-end Development. I have a technical background from the Technical Institute of Computer Science, which I complemented with a Bachelor's degree in Product Design from the University of Ascoli Piceno. I continued my studies with a Master's degree in Communication Theory and Technology from the University of Milan-Bicocca, where I explored communication principles and developed skills in UX/UI Design and front-end development.

Today, I design interfaces for mobile and desktop apps using Figma and other tools, focusing on workflows, layouts, and interactive prototypes.
I follow the entire design process, from analyzing user needs and behaviors, to defining the structure and navigation, all the way to creating visual components, occasionally also handling front-end development.

Education

IT Specialist *2011 - 2016*

- High school , Itis Eustachio Divini - San Severino Marche

Industrial and Environmental Design *2018 - 2022*

- Bachelor's Degree, University of Camerino
