Presentation

I work as a **Frontend Developer** and **UI/UX Designer** — a hybrid profile that combines technical fluency in React, TypeScript, and modern CSS (including Tailwind) with a sharp design sensibility. I have a technical diploma in Computer Science and a Bachelor's degree in Product Design; my Master's degree in Communication Theory and Technology specifically trained me as a UI/UX designer and frontend developer, deepening both my understanding of communication principles and my technical development skills.

In my current role, I build interfaces for web and mobile applications, owning the full process end to end: from analyzing user needs and behaviors, to defining flows and information architecture, to producing wireframes, interactive prototypes, and visual components in Figma — carrying the design through to front-end implementation myself.

I place strong emphasis on **accessibility**: I aim to build interfaces that are accessible from the start of the design process, paying attention to color contrast, keyboard navigation, semantic markup, and WCAG guidelines, and I keep deepening my knowledge in this area.

Education

IT Specialist 2011 - 2016

- High school, Itis Eustachio Divini - San Severino Marche

Industrial and Environmental Design 2018 - 2022

- Bachelor's Degree, University of Camerino

Communication theory and technology 2022 - 2024

- Master's Degree, University of Milano-Bicocca

Work Experience

UI | UX Designer - Front End Developer Jan. 2025 - Present

ATON IT - Milan

- Development and design of web services and applications with a user-centered approach. I handle the analysis of user needs and behaviors, the design of workflows and information architectures, and the creation of wireframes, interactive prototypes, and visual interfaces.

UI | UX Designer - Front End Developer Jan. 2024 - June 2024

ATON IT - Milano - Stage

- Internship during the second year of the master's degree from January 24 to June 24, 2024
- Design and development of web platforms and mobile apps

UI | UX Designer - Front End Developer Dec. 2023 - July 2024

IBS, Tolentino

- Contract work, full-remote position from December 2023 to July 2024
- UX analysis and subsequent design (Figma) and development of the company website
